

Do you have students who...

- Are smart yet are failing to reach their potential?
- Have gaps in their learning due to Covid or other challenges?
- Struggle with comprehension in reading or math or both?
- Hate to write?
- Are frustrated with learning or have given up?

Do you have teachers who...

- Feel like it is nearly impossible to meet the diverse levels of learning ability in each class?
- Find their workload overwhelming?
- Are unsure if they should help some students more than others?
- Wonder how to teach students who did not master the basics in the early grades?
- Could use an infusion of practical help and encouragement?

There is no need for shame.

- We all tend to teach others the way we were taught. When our methods fail to produce the results our students need, we need help that goes beyond the latest educational fad.
- Students today, and their families, are facing a wide array of challenges that often interfere with learning. It seems like each class has more nonstandard learners than ever before.
- The challenges of teaching through a pandemic are traumatic, depleting, and persistent.

I Can Help

I am a trauma-informed learning coach who has learned resilience, in part, because I am a nonstandard learner.

Being labeled with dyslexia, dysgraphia, dyscalculia, and ADHD set me on a quest to understand how the brain learns. What I discovered transformed me and provided strategies that have proven effective for those I have taught and coached.

I put my BS in Elementary Education and MA in Counseling to use in both school and homeschool settings. For decades I've trained teachers and homeschooling parents.

In 2015, I began *Learning Lifeguard*, an educational ministry that provides trauma-informed tailored solutions for families and schools.

Please contact me for more information on training and coaching support.

Grow Resilient Together

How well do your students recover from setbacks? Do you know how to fill their learning gaps and missing skills? What would it do for you and your students if this could be a year of Post Traumatic Growth?

Grow Powerful Communicators

How would it benefit your students in school and life if they become skilled listeners, readers, speakers, and writers? Come ready to discuss what has helped you grow the most in each area. Together we will develop strategies to change the learning in your classroom next week.

Grow Motivated Content Learners

How would it help your students if you could grab their attention, develop their comprehension, and assist them in their retention? Discover how to make your content stick even for your nonstandard learners.
